

**SRI VENKATESWARA COLLEGE OF ENGINEERING AND TECHNOLOGY
(Autonomous)**

DEPARTMENT OF INFORMATION TECHNOLOGY

CIRCULAR

Date: 13-03-2025

It is hereby informed that our department is planned to organize a Workshop to III Year students of IT department on " Coding and development phase in software engineering using GIT and DevOps " on 15-03-2025 from 9.30 AM to 1.00 PM at E-Class Room, SVCET. All the III Year students of IT Department are instructed to attend the workshop without fail.

3. Circulate among the students

SRI VENKATESWARA COLLEGE OF ENGINEERING & TECHNOLOGY

Autonomous

Accredited by NAAC with A+ Grade, B.Tech (CE, ME, EEE, ECE, CSE & IT) Accredited by NBA
Approved by AICTE, New Delhi | Affiliated to JNTUA, Ananthapuramu

Organised By Department of IT & CSE (IoT)
Workshop on

Coding and Development Phase in Software Engineering Using GIT and DevOps

Target students IIIrd year IT and IOT

Date : 15-03-2025

Time : 09:30 AM to 01:00 PM

Venue : E-Class Room

Resource Person

Mr. Bharath Sukka

Senior Analyst at HCL TECHNOLOGIES,
Chennai.

Co-Ordinator

Mrs. S. Kokila

Assistant Professor
Department of IT

HOD - Professor

Dr. J. Velmurugan

Report on Workshop:

Coding and development phase in software engineering using GIT and DevOps

Title: Coding and development phase in software engineering
using GIT and DevOps

Organized By: Department of Information Technology, SVCET

Date: 15th March 2025

Time: 9:30 PM to 1:00 PM

Venue: E-Class Room, IT Department, SVCET

Resource Person:

Bharath Sukka

Senior Analyst at HCL TECHNOLOGIES
Chennai.

HOD-IT: Dr. J. Velmurugan

Coordinators: Mrs.S.KOKILA, Assistant Professor, IT Department

Introduction

The Department of Information Technology organized a workshop on "**Coding and development phase in software engineering using GIT and DevOps**". Workshop provides knowledge on **Git** and its workflow for version control and collaboration, to Explore DevOps practices for continuous integration, delivery, and deployment. The benefits of using **Git** and DevOps in software engineering are discussed and provided hands-on experience with **Git** and DevOps tools and techniques. The event took place on **15th March 2025** from **9:30 AM** to **1:00 PM** in the E-Class room.

Objectives

The key objectives of the workshop are:

1. **Understand Git and DevOps Fundamentals:** Gain a solid understanding of **Git** and DevOps concepts, including version control, continuous integration, and continuous deployment.
2. **Mastering Git Workflow:** Learn how to use **Git** for version control, including creating repositories, branching, merging, and resolving conflicts.
3. **Implementing DevOps Practices:** Understand how to implement DevOps practices, including continuous integration, continuous deployment, and monitoring.

Key Highlights

The resource persons presented detailed insights on the following topics:

1. Comprehensive Git Training: In-depth training on Git, including version control, branching, merging, and conflict resolution.
2. DevOps Practices and Tools: Coverage of DevOps practices, including continuous integration, continuous deployment, and monitoring, using tools like Jenkins, Docker, and Kubernetes.
3. Agile Development Methodologies: Introduction to Agile development methodologies, including Scrum and Kanban, and how to apply them in software engineering.
4. Collaboration and Code Review: Best practices for collaboration, including code reviews, pair programming, and effective communication.
5. Real-World Case Studies: Practical examples and case studies to illustrate key concepts and best practices.
6. Hands-on Coding and Development: Hands-on coding and development exercises to reinforce learning and gain practical experience.

Interactive Session

The workshop concluded with an engaging Q&A session, during which students raised queries about:

- The difference between GIT and other version control systems
- To resolve conflicts in GIT
- The purpose of the staging area in GIT
- To implement continuous integration and continuous deployment in the project
- Popular DevOps tools, and how to choose the right one for the project.
- Monitoring and troubleshooting the application in a DevOps environment.
- How to apply design patterns?

The resource persons provided practical advice and shared personal experiences to help students make informed decisions about their academic and career goals.

Outcomes

At the end of the workshop, participants will be able to:

- Use Git for version control and collaboration
- Implement DevOps practices, including continuous integration and deployment
- Automate testing and deployment using DevOps tools
- Monitor and troubleshoot applications using DevOps tools

Conclusion

The event concluded with a vote of thanks delivered by Mrs. S. KOKILA, Assistant Professor, Department of IT, who acknowledged the efforts of the resource persons and the organizing team. The Workshop received positive feedback from students for its informative content and engaging discussions.

FeedBack:

The workshop received overwhelmingly positive feedback from participants. Here are some key highlights:

- 95% of participants rated the workshop as "Excellent" or "Good".
- 90% of participants felt that the workshop met their expectations.
- 85% of participants reported that they learned something new and useful during the workshop.

Conclusion:

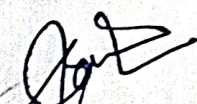

The workshop on "Coding and Development Phase in Software Engineering using GIT and DevOps" was a resounding success. The workshop achieved its objective of providing hands-on training on GIT and DevOps practices, and equipping participants with the skills and knowledge required to implement these practices in their projects.

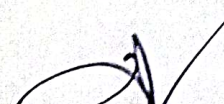

In light of the feedback and suggestions received, we plan to offer more workshops on related topics, such as Agile development and continuous integration. We also plan to invite industry experts to share their experiences and best practices and provide opportunities for participants to network and share their own experiences.
